inventory,
accounting and
shop in one system

Model: Pernille Kristensen, Diva models

♥ Odoo is a high-tech quality business software developed by Odoo Software S.A. The out of the box solution covers ERP, POS and CMS/ Webshop.

♥ We are a recognized official Odoo Partner implementing Odoo in Wholesale & Retail companies.

♥ In order to respond to the specific needs of wholesale and (fashion) retail companies, we have built extra modules for the business. Odoo enhanced with these extra components and modules are branded as Odoo 4 Fashion.

♥ Odoo 4 Fashion is very suitable for wholesale or retail companies in fashion, leatherwear, shoes, sports & leisure items, etc.

♥ Odoo 4 Fashion combines best practices of Odoo software with vertical functionality for wholesale and retail companies. As a result Odoo 4 Fashion enables a fast deployment, an easy user adoption, and a high return on investment.

- ♥ Pricelist
- ♥ Stock reports
- ♥ Webshop Theme

Product Card

The product card has been enhanced with the possibility to add a 'product attribute grouping' resulting in variants for that product (ex : sizes, colours, ...) Extra procurement & cost price calculation enhancements are available. Extra cost price elements like (transport, import duty, stocking costs, etc.) can be added to the purchase price in order to calculate the real cost price of your product. Grouping tags can be added to a product, like season tags, garment type, fabric, gender, country of origin.

101840 - Grey Trousers Brax			
Product Type	Stockable Product	Sale Price	120.00€
Procurement Policy	Delivered quantities	Costed Purchase Price	50.00€ (Delivered quantities)
		Attribute grouping	40.00€
Cost Calculation			
Margin	2.15		
Purchase cost	50.00€		
Other costs			
	Name	Value	% Based on
	Transport	0.00	0.00%
Cost price	50.00€		

Arrival products & Feature products

By using the Odoo 4 Fashion theme that provides a specific Odoo website / webshop theme for wholesale & retail you can easily identify New arrivals & Special feature products on the website.

101840 - Grey Trousers Brax	
Barcode	101840 - Grey Trousers Brax
Size	25
Price	105.00€

Variants

Selecting the attribute grouping results in the automatic creation of predefined variants for that group. Generated variants within a group that are not used can be deleted. Price changes per variant are possible. Note that Odoo 4 Wholesale & Retail (fashion) delivers document reporting, based on same price per variant.

Product Variant Barcode

Odoo 4 Fashion provides the possibility to print Barcode labels as from the Variant card. When installing a Dymo label printer a label preview is available in the 'barcode' tab.

Purchase Flow

Odoo 4 Fashion provides simplified data input for preset variant combinations in Odoo. The variant grid input is placed on top of standard product line input, speeding up data input in the entry process! Odoo 4 Fashion combines item models by attribute group. Regular data entry per variant line remains possible.

Purchase system documents

Odoo 4 Fashion provides modified system documents for purchases where Product quantities are listed on the main invoice. In attachment variant detail with quantities per variant is provided.

Sales Flow

Odoo 4 Fashion provides simplified data input for preset variant combinations in Odoo. The variant grid input is placed on top of standard product sales line input, speeding up data input in the sales entry process! Odoo 4 Fashion combines item models by attribute group. Regular data entry per variant line remains as possible.

Warehouse outbound and delivery

On order confirmation a delivery order is generated. As from the delivery order all product lines are indicated on variants. Reporting has been enhanced in order to show variant detail.

Sales system documents

Similar to the purchase documents, Odoo 4 Fashion provides modified system documents for sales where Product quantities are listed on the main invoice. In attachment variant detail with quantities per variant is provided.

Odoo 4 Fashion is a suite of software products designed specifically for the ever-changing demands of the high fashion industry, sports wear, fur... etc.

With this integrated, configurable solution, you can manage the entire fashion process—from design, inventory management, source and distribute, private brand retail, and wholesale.

Odoo 4 Fashion dealing naturally with sizes and colours, the program revolutionizes production and sales whilst saving you time, money and minimizing errors. It's easy to set up and even easier to use, all information is in one place rather than on multiple spreadsheets. Order confirmations, deliveries and commercial invoices take no time at all and with the touch of a button, you can produce production orders, purchase orders and keep up to date with raw material requirements and stock levels.

Bring
fashion to
your store

Sales Invoice

At invoice generation from delivery notes, noneditable grid input information is shown on the invoice card. Note : according to standard Odoo, quantity and price information is still editable as from the invoice lineinput form.

Sales invoice report

Odoo 4 Fashion provides modified system documents for sales invoices where Product quantities are listed on the main invoice.

POS

The Odoo POS has been optimized with an abundance of new features. We added the possibility to add notes on the ticket and POS session. The POS ticket can be sent by email instead of to the POS ticket printer for mobile POS sessions.

Pricelist and stock reports

On top of numerous standard reporting possibilities of Odoo, Odoo 4 Fashion provides extra pricelists with available stock indication. Viewing item list, grouped by category, extra reporting is providing when clicking the 'Print' button:

Webshop Theme

Odoo 4 Fashion also comes with a custom webshop theme. We added some features like the Featured and New Products on the homepage.

Together with a stylish design it all come together to form a nice complete package.

Odoo 4 FASHION

Odoo 4 Fashion is built on top of Odoo (formerly Open ERP) for fashion industry and "Odoo 4 Fashion" implies the meaning of that.

We at VK DATA ApS / Nisus Solutions (Pvt) Ltd is an Odoo Enterprise and Odoo 4 Fashion partner for Scandinavia, Germany and Sri Lanka.
